Report

I attended the BTS/NTV joint annual conference in Bournemouth during Mar. 11-13, 2015, supported by Nvvi. During the conference, I learned a lot about the latest developments in organ transplantation, both in basic and clinical science. Meanwhile, I presented my abstract “Interplay between donor PD-L1 and recipient PD-1 affects acute rejection after liver transplantation” as oral presentation, and won the “van Rood award” during the conference.
